🔗 Portfolio

Summary

Final-year B.Tech CSE (AI specialization) student with strong interest in Python development, backend development, API integration, and database-driven application design using Python and Django. Continuously strengthening practical skills through learning and hands-on implementation while building strong technical knowledge. Motivated to learn, improve consistently, and contribute to meaningful work. Also interested in UI/UX design and creating user-friendly interfaces.

Education

Parul University — B.Tech (CSE-AI)
CGPA: 8.31

2022 – 2026

Shannen School — Class 12 (HSC)
Percentage: 62%

2022

Bright School — Class 10 (SSC)
Percentage: 83%

2020

Experience

Bharti Soft Tech
Python Intern

Jan 2026

- Developed a strong foundation in Python programming and backend development concepts.
- Learned and implemented the Django framework for web application development, working with REST APIs, database integration, and backend logic.
- Collaborated with the team on requirement analysis and gained exposure to real-world project workflows.
- Contributed to project development through hands-on implementation and practical application of backend development concepts.

Projects

Face Recognition System

- Built an automated attendance system using Python and Flask, utilizing OpenCV for real-time face detection and recognition.
- Implemented RESTful routes for image uploading, video streaming, and report generation using Pandas.
- Optimized database interactions with SQLAlchemy, ensuring efficient storage and retrieval of student logs.
- Developed a responsive frontend interface using HTML5 and CSS3 for administrative control and live monitoring.

Image Insight Generator

- Image Insight Generator is an AI-powered and user-friendly application that transforms images into rich, descriptive text using Google's Gemini model technology.
- Built using Python and integrated with Google's Gemini API, the tool leverages state-of-the-art Generative AI to understand image content and produce human-like responses tailored to the user's needs.
- Pandas is used here for efficient data handling and Generative AI API integration to generate detailed image analytics and insights.
- Whether you need a summary, a blog post, or a creative take, just upload and let the AI do the talking. Get detailed analysis, answer custom queries, and download your results in seconds.

Key Skills / Technologies

Programming: Python, C, Java, JavaScript

Python Libraries (Data): NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Backend & APIs: Django, Flask, REST APIs

Web Development: HTML, CSS, React, Node.js (Basics)

Databases: MySQL, SQLite

Tools: GitHub, VS Code, Postman, PyCharm, Jupyter Notebook, Google Colab

BI Tools (Basic): Power BI, Tableau

UI/UX: Figma, Wireframing, Prototyping

Certifications

Google UX Design (Coursera)

Database and SQL (Infosys Springboard)

Internet of Things (NPTEL)

Computer Networks and Internet Protocols (NPTEL)

Languages Known

English, Hindi, Gujarati, Marathi
