📞 7600354552 ✉️ pranitabhatt03@gmail.com

A motivated and detail-oriented Computer Science undergraduate with a strong foundation in Python, machine learning, and web application development with hands-on project experience.

Education:

B.Tech CSE	(June 2023-Present)
GSFC University, Vadodara	CGPA : 7.46
Diploma	(2020-2023)
Parul Polytechnic Institute, Vadodara	CGPA : 9.30

Experiences :

AI/ML Intern

Jan 2026 – Current

L&T Technology and Services

I joined L&T and am working on AI-related data tasks. My role includes data annotation, labeling, and extracting information from P&ID drawings. I am also involved in R&D for collecting datasets from engineering documents such as Block Diagrams, PFDs, SLDs, and GA drawings.

Data Analytics Intern

Dec 2025 – Jan 2026

Oasis Infobyte

During this internship, I worked on multiple data analytics tasks using real-world datasets. I performed data cleaning, analysis, visualization, and basic machine learning to extract useful insights. This experience helped me strengthen my practical skills and understand how data is used to solve real problems

Summer Research Intern

Jun 2025-Aug 2025

International Institute of Information Technology Bangalore (IIITB)

Worked on the IndicNLP project (Parichaya), applying skills in data collection, Python, RAG, databases, agentic AI, and NLP to build an agentic architecture with vector storage and reasoning logic, and evaluate model accuracy.

Data Engineer

Dec 2024 – Jan 2025

Esparse Matrix Solutions

Built a Django-based Supply Chain Risk Management survey and performed Sentiment Analysis to extract actionable insights on product reviews.

Java Developer

Dec 2023 – Jan 2 2024

Hackveda

Developed a Stock Trading Application using Java, NetBeans, and an embedded RDBMS, gaining experience in real-time data processing and trading features.

SEO Engineer

Dec 2022 – Feb 2023

Dignifiedme

Completed an SEO course and worked with tools like Website Auditor, Rank Tracer, and SEO Spy Glass, improving website performance using PageSpeed Insights and Chrome DevTools, with additional experience in digital marketing.

Key Projects

1. [Smart Surveillance](#)

AI-based Smart Surveillance System that detects safety violations and unauthorized access in real time using Computer Vision and Deep Learning. It auto-records incidents, sends alerts, and updates a central dashboard for efficient monitoring.

3. [Sentiment Analysis](#)

Sentiment Analysis of Product Reviews extracts useful insights from customer feedback using data processing and analysis techniques to support better decisions.

2. [Video Conferencing App with ASL Detection](#)

The Video Conferencing App with ASL Detection enables specially abled users to communicate easily during online meetings by providing real-time sign language transcription.

4. [Tow-App](#)

Tow App uses Java and Firebase to detect vehicle plates, track tow details, and notify users through an officer dashboard.
